ABOUT THE CONGRESS

The **Seventh UAE Epilepsy Virtual Congress**, the first virtual edition of the annual meeting, was held last October 29-30, 2021. The congress established a venue to exchange knowledge and experiences in the management of epilepsy in a unified online space, which was delivered by international, regional and national experts' key speakers from different health and academic institutes. This was accessible to delegates from different parts of the globe.

The congress featured plenary sessions covering all major topics in Epilepsy, Keynote Lecture, Debate Sessions and Satellite Symposia. Sessions were divided into the following topics: Practical Issues in Epilepsy, Comorbidities in Epilepsy, Epilepsy Across Ages and Hot Topics in Epilepsy. The accepted abstracts were showcased in the ePosters Section.

We launched the **LIVE** website for delegates to stream the lectures and interact with the speakers and other participants in real time by sending their questions and feedback in the chat box. Delegates who missed the lectures may watch the videos via On Demand.

Our industry partners were able to showcase their latest technologies through the Virtual Exhibition.

The accreditation for this congress is sought from the Dubai Health Authority (DHA).

The screenshot shows the website interface for the Seventh UAE Epilepsy Virtual Congress. At the top, there is a navigation bar with the ELAE logo, the URL **virtual.elae.ae**, and menu items: LIVE, ABOUT, AGENDA, FACULTY, ABSTRACTS, INDUSTRY, and HI. Below the navigation bar, there are several content tiles: 'Watch LIVE' (The Seventh UAE Epilepsy Virtual Congress), 'FACULTY', 'DAY 1', 'DAY 2', 'ePOSTERS', 'EXHIBITORS', and 'ABOUT'. At the bottom, there are sponsor logos: 'Diamond Sponsor hikma.' and 'Platinum Sponsor gsk'.

ELAE EUMC

ePoster Presentation

Health situation of epileptic patients involved with covid-19 lockdown

DR Seyedmehran Hommam
Associate professor, Department of Neurology, Mashhad Branch, Islamic Azad University, Mashhad, Iran

INTRODUCTION
Epilepsy is one of the most chronic neurological disorders which may affected by various conditions such as covid-19 disease. On the other hand even without involvement by covid-19, because of some restrictions the physical and mental health of patient might be affected.

AIM
The aim of our study was to identify health changes in epileptic patients involved with COVID-19 restrictions. We evaluated their clinical findings including the number of attacks and the quality of receiving their medical services.

METHODS
In COVID-19 involved epileptic patients we distributed a questionnaire by phone call social media or in clinic. we asked them about their health and also about frequency of seizures we also asked them about the quality of receiving of consultations which they have received. we asked them about seizure frequency, root of gathering information and need to change their drugs during covid-19 pandemic.

RESULTS
74 epileptic patients enrolled in our study. 29 of them were male (39.18%) male, their mean age was 32.1 ± 5.6 (year). 29 patients (27%) complained from exacerbation of seizures during covid-19 pandemic and 32 (43%) reported physical and mental health deterioration during this period (p = 0.0001). The main source of receiving of information from health cares and epilepsy organizations was through telecommunication (65%).

HEALTH CHANGES OF 74 EPILEPTIC PATIENT DURING COVID-19 LOCKDOWN

Health Change	Percentage
Seizure Exacerbation	30%
Mental and Physical Health Change	43%
No Change	27%

CONCLUSIONS
Our findings indicates that during COVID-19 pandemic, may result in worsening of seizure control and also health status in some patients if the patients have easy accessibility to antiepileptic drugs and have better communication to health care centers may result in prevention of attacks during COVID-19 restrictions.

Ask a Question

Dr. Rozsa Andras:
I truly mean, these people may attract further abuse from medical personals, as counter transference. How one have to handle that?

MohamedYousef:
For Dr. Salim. About ictal sing like dilated pupil . Investigation like dopamine level,

Ahmad Fawaz:
Hi How can we convince psychiatrist about PNES, cause it seems worldwide problem, should we do special meetings and lectures for them question for Dr Bennbaid

LIVE SESSION 1: PRACTICAL ISSUES IN EPILEPSY

SESSION 1: HOT TOPICS IN EPILEPSY

Dr. Salim Dinesh, Dr. Ali Alami Prasad, Dr. Saif Bannan, Dr. Salim Bennbaid

WATCH LIVE

Ask a Question

Rezaei Support:
Dear professor Dr. Dineh

Rezaei M. Rezaei:
I'm grateful to attend this enlightening, enlightening and consider access as it is one of the things

OMAR AL-JORANI:
I'm grateful to attend this enlightening, enlightening and consider access as it is one of the things

Type a message...

Process of Review of Templates

- One Task Force member drafted the template
- Templates were circulated to all working group members and discussed in detail at virtual or in-person meetings and further amended

Core criteria for each syndrome were proposed as follows:

- Mandatory** – must be present to diagnose the syndrome
- Exclusionary** – must be absent to diagnose the syndrome
- Alerts** – are absent in most cases, but rarely can be seen. Alerts should cause the clinician to rethink the diagnosis and possibly undertake further investigations

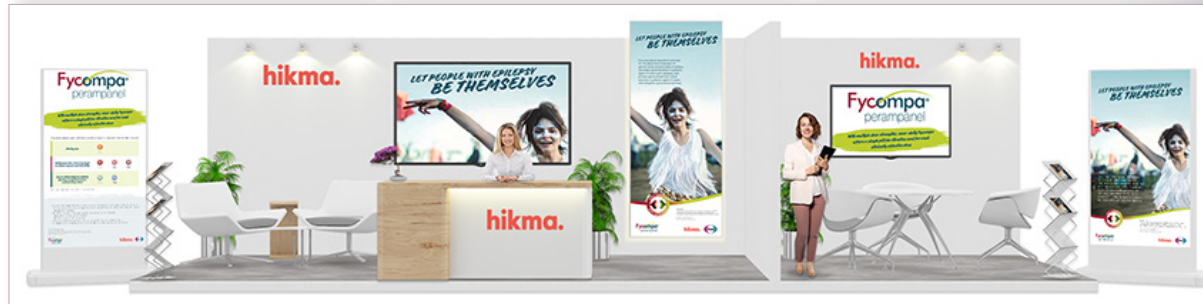

WATCH LIVE

Ask a Question

Rezaei M. Rezaei:
Dear professor Dr. Dineh, my question is about the use of video EEG monitoring in the diagnosis of PNES. How many patients have been monitored using video EEG monitoring in your center? How many patients have been monitored using video EEG monitoring in your center? How many patients have been monitored using video EEG monitoring in your center?

Wassan Dahan:
Dear professor Dr. Dineh, my question is about the use of video EEG monitoring in the diagnosis of PNES. How many patients have been monitored using video EEG monitoring in your center? How many patients have been monitored using video EEG monitoring in your center? How many patients have been monitored using video EEG monitoring in your center?

The Seventh UAE Epilepsy Virtual Congress

October 29-30, 2021

www.elae.ae
www.congress2021.elae.ae

Dear Friends and Colleagues,

First of all, and on behalf of the ELAE Executive Board, I would like to express my sincere appreciation for your interest to join us at the Seventh UAE Epilepsy Congress. As you all aware of the global spread of Coronavirus (COVID-19) and its unprecedented impact on all sectors, which has caused major difficulties and uncertainties in running businesses, including medical events, as usual. Therefore, the 7th ELAE organizing Committee, and after consulting with the UAE Governmental officials, has decided to conduct our congress on October 29-30, 2021 in a virtual format. We have decided to keep the same agenda and, as a reflection on the impact of COVID-19 on all us, with the addition of one session on delivering epilepsy care at the time of disasters.

I look forward to welcoming you online at the Seventh UAE Epilepsy Congress.
