Course Description

"Certificate in Digital Education" aims to equip faculty educators with the knowledge and skills needed to effectively teach learners in blended and online environments. This is a cohort-based online course, facilitated by the Center for Learning and Teaching at the Institute for Excellence in Health Professions Education (ieHPE).

Course Learning Objectives

By the end of the course, learners are expected to be able to:

1. Discuss learning and teaching in the light of neuroscience
2. Evaluate the alignment between the learning outcomes, assessments, and class activities in the courses they teach
3. Use student-centered instructional strategies to support effective learning in blended and online settings
4. Effectively design, develop and assess learning in blended and online environments.
